

Trade DIVISION

GRADER BLADE PROGRAM

AAMDC's Grader Blade Program was developed in 2016 to streamline the procurement process for grader blades and other ground engagement tools. The Trade Division utilized a Request for Proposal (RFP) to establish firm contractual agreements with selected suppliers and establish a standing offer agreement with several vendors that provides our membership with pricing reflective of the collective volume of all AAMDC members.

The AAMDC has historically provided value to membership through working exclusively with approved trade suppliers to ensure consistent quality service and products along with competitive pricing. As the market has changed significantly, the Trade Division intends to establish this standing offer purchasing solution to meet the current needs of members and continue to provide value in their procurement.

PROGRAM BENEFITS

- Minimizes price fluctuations - Volatility in this market is determined by changes in the cost of raw goods, the introduction of foreign competitors to the marketplace and the slim margins for vendors in the supply of goods.
- NWPTA Compliant
- Transparent and Consistent pricing
- Minimizes Administration. Our membership does not need to go to tender year after year
- The pricing model for AAMDC's program consists of an everyday discount price for smaller quantity orders and truckload pricing for orders that constitute direct delivery.
